Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the (publisher, society); and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US$ 0.20 per page, or a minimum of US$ 1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0028-1298, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents of volume 338

No. 1 published on August 15, 1988

R. Wölfel, W. Böhm, T. Halbrügge, H. Bönisch, K.-H. Graefe: On the 5-hydroxytryptamine transport across the plasma membrane of rabbit platelets and its inhibition by imipramine **1**

K. Fink, E. Schlicker, R. Betz, M. Göthert: Identification of presynaptic 5-HT_1 autoreceptors in pig brain cortex synaptosomes and slices **9**

A. J. Azzaro, J. B. Amedro, L. M. Brown, D. J. Smith, G. M. Williams: The effect of selective type A or type B monoamine oxidase inhibition on the intrasynaptosomal deamination of (^{3}H)serotonin in rat spinal cord tissue **14**

A. Wellstein, H. F. Pitschner: Complex dose-response curves of atropine in man explained by different functions of M_1- and M_2-cholinoceptors **19**

E. Werle, T. Lenz, G. Strobel, H. Weicker: 3- and 4-O-sulfoconjugated and methylated dopamine: highly reduced binding affinity to dopamine D_2 receptors in rat striatal membranes **28**

C. E. Clarke, S. Boyce, M. A. Sambrook, S. M. Stahl, A. R. Crossman: Behavioural effects of (+)-4-propyl-9-hydroxynaphthoxazine in primates rendered parkinsonian with 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine **35**

S. M. Celuch, A. V. Juorio: Pre- and post-synaptic effects of *p*-tyramine and *p*-octopamine in the prostatic portion of the rat vas deferens **39**

W. C. Randall, J. R. Huff, J. P. Vacca, J. P. Guare, R. Chen, A. Rosegay, J. J. Baldwin: [^{3}H]L-654,284 as a probe of the central alpha$_2$ adrenoceptor **47**

N. Limberger, L. Späth, K. Starke: Presynaptic α_2-adrenoceptor, opioid κ-receptor and adenosine A_1-receptor interactions on noradrenaline release in rabbit brain cortex **53**

N. Limberger, E. A. Singer, K. Starke: Only activated but not non-activated presynaptic α_2-autoreceptors interfere with neighbouring presynaptic receptor mechanisms **62**

T. Kitazawa, K. Kudo, M. Ishigami, H. Furuhashi, K. Temma, H. Kondo: Evidence that a substance P-like peptide mediates the non-cholinergic excitatory response of the carp intestinal bulb (Cyprinus carpio) **68**

W. Seeger, U. Moser, L. Roka: Effects of alpha-tocopherol, its carboxylic acid chromane compound and two novel antioxidant isoflavanones on prostaglandin H synthase activity and autodeactivation **74**

T. Beck, P. Vogg, J. Krieglstein: Uncoupling of cerebral blood flow and glucose utilization by dihydroergocristine in the conscious rat **82**

W. Bernauer, I. Ernenputsch: Antagonistic effects of α-adrenoceptor blocking agents on arrhythmias, enzyme release, and myocardial necrosis in isolated rat hearts with coronary occlusion and reperfusion **88**

Short communication

J. Puurunen: Centrally applied histamine increases gastric acid secretion in rats **96**

No. 2 published on August 30, 1988

U. Weller, F. Mauler, E. Habermann: Tetanus toxin: Biochemical and pharmacological comparison between its protoxin and some isotoxins obtained by limited proteolysis **99**

C. A. Maggi, R. Patacchini, P. Santicioli, I. Th. Lippe, S. Giuliani, P. Geppetti, E. Del Bianco, S. Selleri, A. Meli: The effect of omega conotoxin GVIA, a peptide modulator of the N-type voltage sensitive calcium channels, on motor responses produced by activation of efferent and sensory nerves in mammalian smooth muscle **107**

P. J. S. Chiu, G. Tetzloff, M. Chatterjee, E. J. Sybertz: Phorbol 12,13-dibutyrate, an activator of protein kinase C, stimulates both contraction and Ca^{2+} fluxes in dog saphenous vein **114**

C. Ciccarelli, B. M. Zani, M. Molinaro, F. Grassi, F. Eusebi: Spontaneous channel activity induced by tumor promotor TPA in chick myotubes **121**

M. A. Rogawski: Transient outward current (I_A) in clonal anterior pituitary cells: blockade by aminopyridine analogs **125**

A. J. Anderson, A. L. Harvey: Effects of the facilitatory compounds catechol, guanidine, noradrenaline and phencyclidine on presynaptic currents of mouse motor nerve terminals **133**

I. Wessler, A. Diener, M. Offermann: Facilitatory and inhibitory muscarine receptors on the rat phrenic nerve: effects of pirenzepine and dicyclomine **138**

I. Fagervall, D. Kelder, S. B. Ross: Selective inhibition by 4,α-dimethyl-m-tyramine (H77/77) and 4-methyl-α-ethyl-m-tyramine (H75/12) of the monoamine oxidase within serotonergic and noradrenergic neurons in the rat brain **143**

H. Nissbrandt, G. Engberg, H. Wikström, T. Magnusson, A. Carlsson: NSD 1034: An amino acid decarboxylase inhibitor with a stimulatory action on dopamine synthesis not mediated by classical dopamine receptors **148**

C. A. Altar, W. C. Boyar, A. Wasley, S. C. Gerhardt, J. M. Liebman, P. L. Wood: Dopamine neurochemical profile of atypical antipsychotics resembles that of D-1 antagonists **162**

H. Haikala, L. Ahtee: Antagonism of the nicotine-induced changes of the striatal dopamine metabolism in mice by mecamylamine and pempidine **169**

J. A. Simaan, G. Fawaz, K. Jabbour: Comparison of the cardiodynamic and metabolic effects of dobutamine with those of norepinephrine and dopamine in the dog isolated heart **174**

M. Grohmann, M. Henseling: Lack of differences between the neuronal and extraneuronal handling of ^{3}H-7- and ^{3}H-ring-2,5,6-(−)noradrenaline **180**

J. T. A. Knape, P. A. van Zwieten: Positive chronotropic activity of angiotensin II in the pithed normotensive rat is primarily due to activation of cardiac β_1-adrenoceptors **185**

C. L. E. Broekkamp, S. K. Oosterloo, H. H. G. Berendsen, A. M. L. van Delft: Effect of metergoline, fenfluramine, and 8-OHDPAT on catalepsy induced by haloperidol or morphine **191**

J. Lang, Q. Timour, J.-P. Lançon, J.-F. Aupetit, G. Faucon: Biphasic dose-response relationship observed with Bay k 8644 on atrioventricular nodal conduction inhibited by verapamil **196**

G. K. L. Tiong, J. E. Olley: Enzyme immunoassay of buprenorphine **202**

Short communications

H. F. Pitschner, A. Wellstein: Dose-response curves of pirenzepine in man in relation to M_1- and M_2-cholinoceptor occupancy **207**

N. C. Punt, F. Th. M. van Amsterdam, M. M. Goddijn, M. Haas, J. Zaagsma: Positive inotropic effects of calcium channel antagonists are not necessarily caused by partial calcium channel agonism **211**

No. 3 published on September 30, 1988

R. Remie, H. J. Knot, H. J. Kolker, J. Zaagsma: Pronounced facilitation of endogenous noradrenaline release by presynaptic β_2-adrenoceptors in the vasculature of freely moving rats **215**

K. Shinozuka, R. A. Bjur, D. P. Westfall: Characterization of prejunctional purinoceptors on adrenergic nerves of the rat caudal artery **221**

G. J. Molderings, J. Likungu, F. Hentrich, M. Göthert: Facilitatory presynaptic angiotensin receptors on the sympathetic nerves of the human saphenous vein and pulmonary artery. Potential involvement in β-adrenoceptor-mediated facilitation of noradrenaline release **228**

J. Gonçalves, J. P. Nunes, M. Q. Paiva, S. Guimarães: Loss of selectivity of so-called selective α_1-adrenoceptor agonists after phenoxybenzamine **234**

O. A. Downing, W. Stein, K. A. Wilson, V. G. Wilson: A comparison of the actions of noradrenaline and UK-14,304 in the longitudinal smooth muscle of the rat isolated portal vein — no evidence for a population of post-junctional alpha$_2$-adrenoceptors **239**

J. Wess, P. Angeli, C. Melchiorre, U. Moser, E. Mutschler, G. Lambrecht: Methoctramine selectively blocks cardiac muscarinic M_2 receptors in vivo **246**

K. Wedzony, N. Limberger, L. Späth, T. Wichmann, K. Starke: Acetylcholine release in rat nucleus accumbens is regulated through dopamine D_2-receptors **250**

S. J. Won, M. T. Lin: 5-Hydroxytryptamine receptors in the hypothalamus mediate thermoregulatory responses in rabbits **256**

M. Yamamoto, M. Shimizu: Effects of a new TRH analogue, YM-14673 on a passive avoidance test as a possible criterion of improvement in cognitive disturbance in rodents **262**

K. Schrör, C. Thiemermann, P. Ney: Protection of the ischemic myocardium from reperfusion injury by prostaglandin E_1 inhibition of ischemia-induced neutrophil activation **268**

K. Lee, S. Miwa, Y. Hayashi, K. Koshimura, T. Taniguchi, Y. Orii, M. Fujiwara: Effects of hypoxia on contractile responses of rabbit aortic strips to transmural electrical stimulation **275**

J. Donnerer: Reflex activation of the adrenal medulla during hypoglycemia and circulatory dysregulations is regulated by capsaicin-sensitive afferents **282**

A. Krantis, W. Potvin, R. K. Harding: Peptide YY (PYY) stimulates intrinsic enteric motor neurones in the rat small intestine **287**

N. Ogawa, H. Ono: Effect of 8-(N,N-diethylamino)-octyl-3,4,5-trimethoxybenzoate (TMB-8), an inhibitor of intracellular Ca^{2+} release, on autoregulation of renal blood flow in the dog **293**

J. Y. Su: Intracellular mechanisms of verapamil and diltiazem action on striated muscle of the rabbit **297**

W. Knepel, C. Schöfl, D. M. Götz: Arachidonic acid elevates cytosolic free calcium concentration in rat anterior pituitary cells **303**

J. S. Southerton, A. H. Weston, K. M. Bray, D. T. Newgreen, S. G. Taylor: The potassium channel opening action of pinacidil; studies using biochemical, ion flux and microelectrode techniques **310**

U. Quast, Y. Baumlin: Comparison of the effluxes of $^{42}K^+$ and $^{86}Rb^+$ elicited by cromakalim (BRL 34915) in tonic and phasic vascular tissue **319**

W. Hellmann, F. Suzuki, H. Ohkubo, S. Nakanishi, G. Ludwig, D. Ganten: Angiotensinogen gene expression in extrahepatic rat tissues: application of a solution hybridization assay **327**

J.-C. Féray, R. Garay: Demonstration of a Na^+: Mg^{2+} exchange in human red cells by its sensitivity to tricyclic antidepressant drugs **332**

No. 4 published on November 21, 1988

P. E. Light, Z. Y. Sahaf, S. J. Publicover: Stimulation of spontaneous transmitter release at the frog neuromuscular junction by 12-O-tetradecanoylphorbol-13-acetate occurs in the absence of extracellular Ca^{2+} and is enhanced by depolarization **339**

M. Carlsson, A. Carlsson: In vivo evidence for a greater brain tryptophan hydroxylase capacity in female than in male rats **345**
